E.V. Cherry
Quarter Cut

E.V. Wenge
Quarter Cut

Zebrano

Zebrawood

NOTE: These veneers are considered our most popular and standard ranges. If you do not see a species you are looking for, please inquire with EOMAC. If you have a sample you are looking to match, please send it into the office for veneer matching or custom staining options.

These images are to be used as a selection tool. The actual selection may differ due to it being a natural product as each tree is different - the grain, colouring and look may vary. Submittal samples are highly recommended.

** Asterisk veneers are considered in stock. Please confirm order quantities with the Eomac team to confirm availability. **
